FIRE RISK ASSESSMENT

Fire Risk Assessment has been a fundamental part of fire safety legislation since 1997. However, with the introduction of the Regulatory Reform (Fire Safety) Order 2005, the need for a business to have a current Fire Risk Assessment has increased and become a necessity.

ICAS Ltd can assist in the development of your Fire Risk Assessment or can audit your fire system for regulatory compliance.

A fire risk assessment is a written document which is mandatory for every company to have and should include (but not limited to):

- Means of Escape in Case of Fire
- Building Structure
- Fire Alarm Systems/Detection
- Fire Fighting Equipment
- Emergency Lighting
- Signs and Notices
- Training.
- Fire Instruction and Drills
- Statutory Records
- House keeping

Fire safety risk assessment

1 Identify fire hazards

Identify:

- sources of ignition;
- sources of fuel; and
- sources of oxygen.

2 Identify people at risk

Identify:

- people in and around the premises; and
- people who are especially at risk.

3 Evaluate, remove or reduce, and protect from risk

- Evaluate the risk of a fire starting.
- Evaluate the risk to people from a fire.
- Remove or reduce fire hazards.
- Remove or reduce the risks to people from a fire.
- Protect people by providing fire precautions.

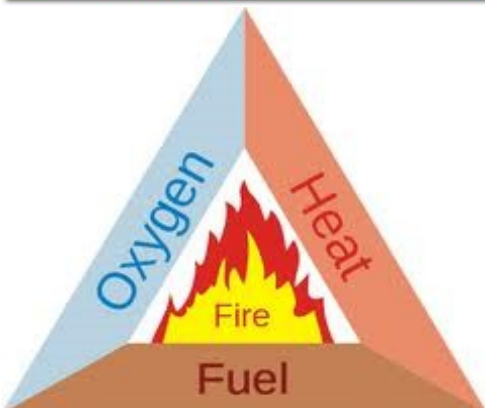

4 Record, plan, inform, instruct, and train

- Record any major findings and action you have taken.
- Discuss and work with other responsible people.
- Prepare an emergency plan.
- Inform and instruct relevant people.
- Provide training.

5 Review

- Review your fire-risk assessment regularly.
- Make changes where necessary.

Remember to review your fire-risk assessment regularly.
